## Instructions for completing the delivery and examination order

### Address area

Please fill in the address block at the top of the page, your address and possibly a different billing address.

Please tick if you supply the animals with us or whether we should collect them from you. Please enter dates for collection by us or by sending you so that we can schedule the arrival of the animals.

### Selection of the requested examinations

Please give animal or sample ID names in the the second form field and select each of the required examinations. The listed studies are described below. Please mark with a cross if you prefer the classical methods (ELISA, culture/microscopy) or PCR.

#### Package FELASA small

includes small serology, MHV, MVM, MPV, EDIM, murine Norovirus, GDVII (required serum volume: 60µl)

microbiology, parasitology, pathology

helicobacter spp.; h. hepaticus, h. bilis, h. typhlonius

#### Package FELASA large

includes large serology, MHV, MVM, MPV, EDIM, murine Norovirus, GDVII, M. pulmonis, PVM, Sendai, C. piliforme, LCMV, MAD type 1FL&2K87, Ectro, Reo3 (required serum volume: 100µl)

microbiology, parasitology, pathology

helicobacter spp.; h. hepaticus, h. bilis, h. typhlonius

#### Serology small profile

includes MHV, MVM, MPV, EDIM, murine Norovirus, GDVII (required serum volume: 60µl)

#### Serology large profile

includes MHV, MVM, MPV, EDIM, murine Norovirus, GDVII, M. pulmonis, PVM, SENDAI, C. piliforme, LCMV, MAD type 1FL&2K87, Ectro, Reo3 (requested serum volume: 100µl)

#### Serology Special Pathogens

The following special pathogens can be diagnosed:

Mouse thymic virus, Lactate dehydrogenase virus, K virus, Polyoma, Hantaan, E. cuniculi, Mouse cytomegalo virus, Cilia-associated respiratory bacillus

Please mark with a cross special pathogens in the column serology and add the desired pathogen in writing in the field behind the checkbox.

#### Parasitology

For parasitology fecal sample, anal-tape imprints on slides or fur-tape samples on slides are required. We check for protozoa, nematodes, mites, fleas, lice.

#### Pathology/Necropsy

Macroscopic evaluation of organs, sampling

#### Microbiology

For microbiology organ smears are required. When sending in organ smears please use smear instruments with transport medium.

For microbiological testing you can also send recently extracted organs on ice or dry ice.

# Examination order form

## Helicobacter

For the examination for Helicobacter intestinal tissue or feces are required as test material.

## Single / Special Investigations

Among individual / special investigations extra examinations can be requested, which are not included in the list.

## Additional information

Because we are committed to GenTAufzV to document the work with genetically modified animals, please provide us in this case the GVO documentation together with the order. Otherwise, check the box that no genetically modified animals will be sent.

Then please tick how you wish to receive your results, electronically or by mail.

Below, under 'additional remarks' you can tell us more information that you deem important.

Now print the form and fax it to us at the number 06734 - 911 222 or submit the form via Scan (info@mfd-diagnostics.com).
