

Press Release

Wendelsheim, 1 March 2010

Mfd Diagnostics GmbH received ISO certification for quality management.

The mfd Diagnostics GmbH announced that it has been certified by TÜV Nord to DIN EN ISO 9001-2008.

After a thorough review by the TÜV Nord mfd Diagnostics meets all the requirements of international quality management standard DIN EN ISO 9001-2008 and obtained the certificate. The scope of certification includes diagnostics for veterinary medicine and laboratory diagnostics and counseling for biomedical research.

"By certifying the hard work of our teams in the field of quality management is rewarded. This confirmation led us to continue improving our business processes and services and increase customer satisfaction," said mfd's managing director Simone Maurer.

MFD stands for Models, Facts, Dates. The company was founded out of the University of Mainz in 2004 and sees itself as a service provider for biomedical research. The team is formed by professionals with extensive experience in animal husbandry and breeding, as well as in diagnostics, pharmacology and pathology. Particular attention is paid on individual consultation and service-orientation.
