Wendelsheim, 5 July 2010

mfd Diagnostics achieves additional capacity in the extension of the micro forum in Wendelsheim

To expand the laboratory and housing capacities in the high technology park Mikroforum the plans of a new hall are implemented in close cooperation with the mfd Diagnostics GmbH located in Wendelsheim. From the total amount of 4 million € invested nearly 2 million are put into sophisticated laboratory technology, mfd Diagnostics will set new quality standards with. The new building is divided into several functional areas, which will be partly used by mfd as one office unit and several separated laboratories as well as a rodent and pig husbandry. The husbandries are especially designed for functionality and economics in the light of legal rules and regulations on laboratory animals.

„Special emphasis is placed on strict hygienic separation of different areas. Individual ventilation units, strict physical separation of pure and impure areas and strict access restrictions ensure the highest possible level of hygiene,“ comments Dr. Marko Maringer, chief of the mfd-owned research and service unit.

The new building is to be ready for occupancy in the winter 2010/2011.
A further review of the construction project and the current construction progress, you can get under www.mikroforum.de.
