

## Press release

Wendelsheim, 8 October 2010

### **mfd Diagnostics at the Pharmaforum in Mainz**

This year's Pharmaceutical Forum of the states of Rheinland-Pfalz, Hessen and Saarland in connection with the vfa on 03 November 2010 takes place in the ZDF Conference Center in Mainz. There will be talks from various companies and an exhibition on the subject of "Personalized Medicine - Where next for pharmaceutical / biotech, health insurers and patients?". The mfd Diagnostics GmbH will join the forum as part of the cluster Immunology Wendelsheim.

The cluster of Applied Life Sciences built by the three companies AeskuDiagnostics, Thymed and mfd Diagnostics provides the basis for ongoing, interdisciplinary and international research and development in the field of immunity, particularly in autoimmunity. The knowledge base of this network in Wendelsheim ranges from biomarker discovery, antibody production and assay development through toxicological and pharmacological studies, assessment of immunogenicity and the monitoring of the immune response to the design of new vaccines, the ISO-certified manufacturing and support for licensing, marketing and sales. For more information, visit mfd Diagnostics GmbH at [www.mfd-diagnostics.com](http://www.mfd-diagnostics.com).

#### **Additional Information**

Company profile of mfd Diagnostics GmbH

MFD stands for Models, Facts, Dates. The company was founded out of the University of Mainz in 2004 and sees itself as a service provider for biomedical research. The team is formed by professionals with extensive experience in animal husbandry and breeding, as well as in diagnostics, pharmacology and pathology. Particular attention is paid on individual consultation and service-orientation.
