

Press release

Wendelsheim 31 August 2011

Optimized report generation for the health monitoring

To further improve the quality and to avoid errors in the transmission of reports, mfd Diagnostics has recently started a new diagnostic software, recording results faster and more reliable. The structure of the reports was also changed showing the most relevant parameters for FELASA right at the beginning of a report. From 1 September 2011, the routine reports will be sent to the customer via e-mail and by letter just on special request.

'This is one step on the way to the paperless office also for our customers ', says Simone Maurer, director of the mfd Diagnostics GmbH.

Additional Information

Company profile of mfd Diagnostics GmbH

MFD stands for Models, Facts, Dates. The company was founded out of the University of Mainz in 2004 and sees itself as a service provider for biomedical research. The team is formed by professionals with extensive experience in animal husbandry and breeding, as well as in diagnostics, pharmacology and pathology. Particular attention is paid on individual consultation and service-orientation.
