

Press release

Wendelsheim 5 October 2011

Large animal studies now feasible in Wendelsheim

After mfd Diagnostics has moved into a modern laboratory building beginning of the year, large animal studies in pigs, sheep and goat are practicable. Recently, the pig sty and a highly efficient operating room were completed and are now ready for use. With this equipment, orders can be processed from both the pharmaceutical and diagnostics industry, as well as from the medical device industry in the field of therapeutic implants. Support is given in administration, animal procurement, animal husbandry, proper anesthesia, pre-and postoperative care of animals, health monitoring, histological examinations, monitoring of various clinical or physiological parameters as well as performing specific analysis and the documentation and archiving of results on the responsibility of currently two veterinarians.

'Our complete offering reliefs scientists in medical, pharmaceutical and biomedical research. Special issues can be addressed state-of-the-art in the now available species', said Dr med vet. Bernd Lecher, Director of the mfd Diagnostics GmbH.

Additional Information

Company profile of mfd Diagnostics GmbH

MFD stands for Models, Facts, Dates. The company was founded out of the University of Mainz in 2004 and sees itself as a service provider for biomedical research. The team is formed by professionals with extensive experience in animal husbandry and breeding, as well as in diagnostics, pharmacology and pathology. Particular attention is paid on individual consultation and serviceorientation.
