

From basics to essentials
From diagnostics to in vivo-research

Husbandry and Breeding Service

We're dedicated to provide the quality animal services that can help you accelerate your research. All our programs have a high standard of compliance with applicable national laws and regulations, such as the animal protection law and the guidelines of GV-SOLAS and FELASA. Our position is based on the philosophy that only good animal welfare leads to good research.

Providing care and maintenance of laboratory animals in our facilities means:

- Providing a welfare and highly standardised husbandry
- Facilities like IVC-racks, isolators, FTCs for mice, rats, guinea pigs, hamster
- Options for quarantine
- Data base
- Complete health monitoring according to FELASA
- Genotyping
- Controlled food, water, bedding

Outsourcing of mice and rat lines provides many benefits to our customers: due to our customised solutions you save investments, space, time and finally money that can be reinvested in your research activity.

We offer a door-to-door transportation service.

ISO 9001 certified, GLP accredited
