

From basics to essentials
From diagnostics to in vivo-research

Diagnostics

Complete health monitoring service for laboratory animals

Health certificates following recommendations of the Federation of European Laboratory Animal Science Associations (FELASA).

Our services include:

- Serological tests (ELISA)
- Direct antigen test (RT-PCR / PCR)
- Parasitology
- Pathology (Histopathology)
- Cytology
- Microbiological tests (differentiation, antibiogram)
- Coagulation screening from blood samples
- Clinical chemistry for different species (mice, rats, dogs, pigs . . .)

All tests are conducted in house in our fully equipped laboratories.

Positive results from serology are double checked for your security.

We are offering an animal transport service in a fully air-conditioned van.

Mfd diagnostics GmbH regularly takes part successfully in interlaboratory tests. Due to this additional external validation the quality of investigations is safeguarded.
