

From basics to essentials
From diagnostics to in vivo-research

Products and Services

For us customer service comes first! Our most common services are listed below, but please ask for individual solutions to solve your particular problem.

Animal care

- laboratory rodent housing
- contract breeding
- quarantine station
- bioremediation / sanitation
- cryopreservation / embryo transfer

Diagnostics

Health monitoring according to FELASA

- pathology / histopathology
- cytology
- clinical chemistry
- hematology / coagulation

In close contact with our customers we design and conduct studies to analyse toxicological risk, pharmacokinetics or LADME evaluations. We offer reproducible and comprehensible studies according to your individual needs.

Review of animal housing facilities

Our experts are consulting companies and research institutes regarding animal housing facilities and will give advice for improvements.

Contract research on animal models

- pharmacological studies
- toxicological studies
- Medical devices testing
- phenotyping of transgenic (knock-out) models
- tumour models

Antibodies & assay development

Tailor-made solutions in
antibody generation
protein production & purification
antibody testing
assay development
